

Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption. For the construction of CPI numbers, two requisite components are weighing diagrams (consumption patterns) and price data collected at regular intervals. The data refers to the All India Consumer Price Index with the base year 2012 =100 and combined for both rural and urban areas.

All India Consumer Price Index (CPI) – Cereals and products have increased from 144.9 in January 2021 to 148.2 in November 2021 showing an increase of 3.3 points. All India Consumer Price Index (CPI) – Vegetables has increased from 194.2 in January 2021 to 199.2 in November 2021 showing an increase of 5 points. All India Consumer Price Index (CPI) – Fruits has increased from 149.6 in January 2021 to 156.5 in November 2021 showing an increase of 6.9 points. All India Consumer Price Index (CPI) – General index has increased from 157.3 in January 2021 to 166.7 in November 2021 showing an increase of 9.4 points.

Consumer Price Index (CPI) for the rural area, the General index has increased from 158.5 in January 2021 to 167.6 in November 2021 showing an increase of 9.1 points. Consumer Price Index (CPI) for the urban area, General index has increased from 156 in January 2021 to 165.6 in November 2021 showing an increase of 9.6 points.
